- These are phase fees. They assume that a facility will take a year to complete the tasks of each phase; if the facility takes longer, additional fees will apply. If a facility takes less than a year to complete a phase, it may move on to the next phase by submitting the appropriate materials and next phase fee.

-The fees also include a portion of the final assessment fee. For single-site facilities, the only additional charge at the time of assessment would be travel expenses for 2 assessors: travel, lodging and meals. For multi-site facilities, an additional fee of $1,500 per day will apply as well as travel expenses reimbursement.
