PRICE <sup>2</sup>	CATEGORY
\$2,000	Hospital
\$1,200	Birth Center and Hospital with <500 births per year

<sup>1</sup> These are phase fees. They assume that a facility will take a year to complete the tasks of each phase; if the facility takes longer, additional fees will apply. The fees also include a portion of the final assessment fee – the only additional charge at the time of assessment would be for assessor travel, lodging and meals.

<sup>2</sup> plus travel expenses for 2 assessors at time of assessment.
